Blackboard Collaborate - Video Conferencing Homepage - 1

Some browsers need access to your microphone to play audio, even if you don't plan to speak. To hear others in the session, give the browser permission to access the microphone.

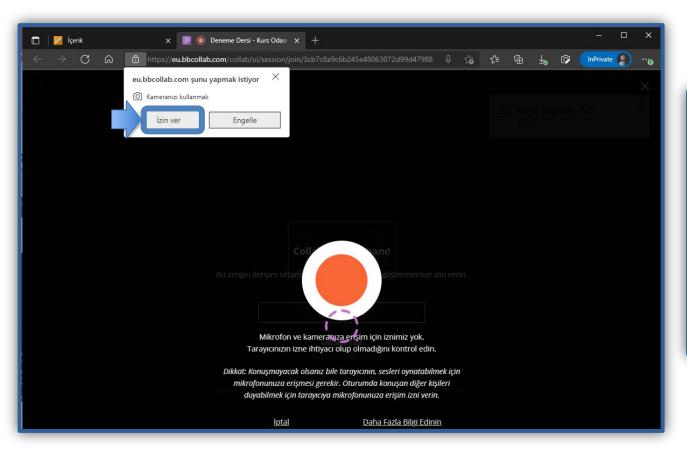

Blackboard Collaborate - Video Conferencing Homepage - 2

You must complete audio and video set up at least once before you can use them.

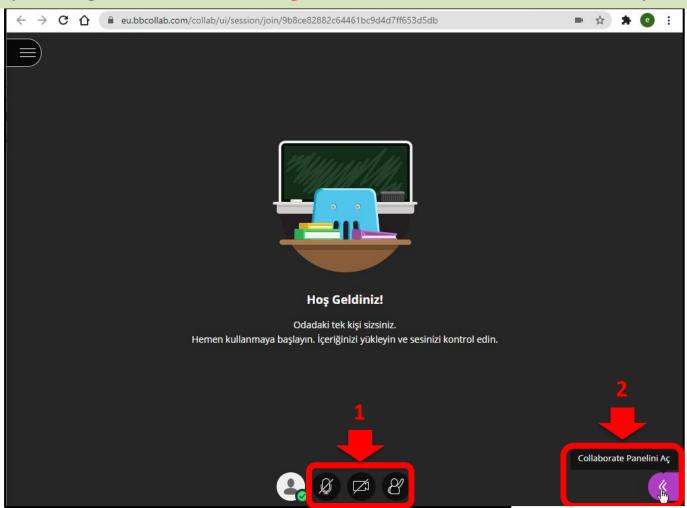

Blackboard Collaborate - Video Conference Homepage - 3

- Users can share audio-video by the menus at the bottom of the page or can use raise your hand button.
 - 2. By clicking the arrow on the right, the collaborate menus can be opened.

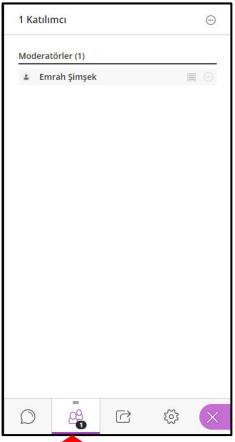

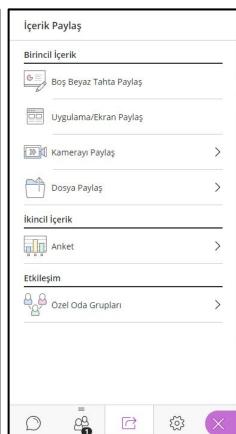

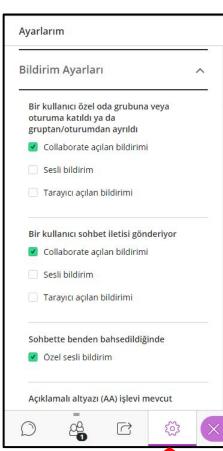

Collaborate - Video Conferencing Room Settings

In the panel on the right, there are **Chat**, **Participants**, **Share** and **Settings** tabs.

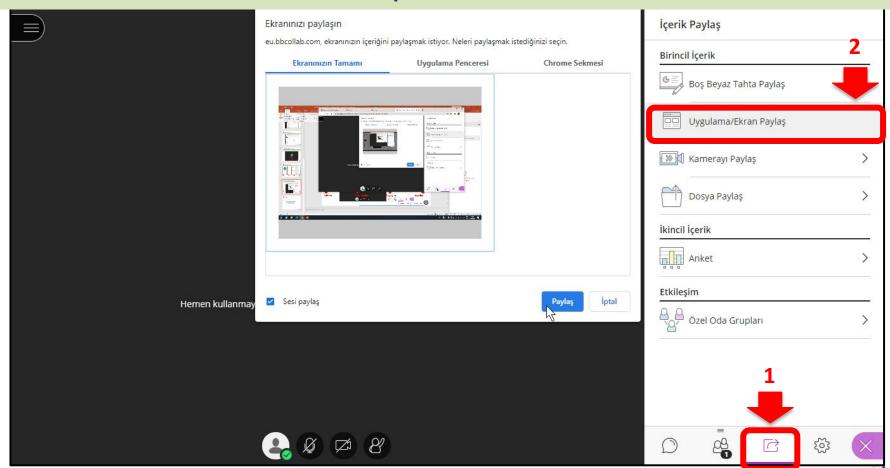

Content Sharing in a Video Conferencing Room

You can share your screen or application window by performing the following operations on the panel in order.

In order to use the content sharing menu, you must be appointed as a **moderator** or **presenter**.

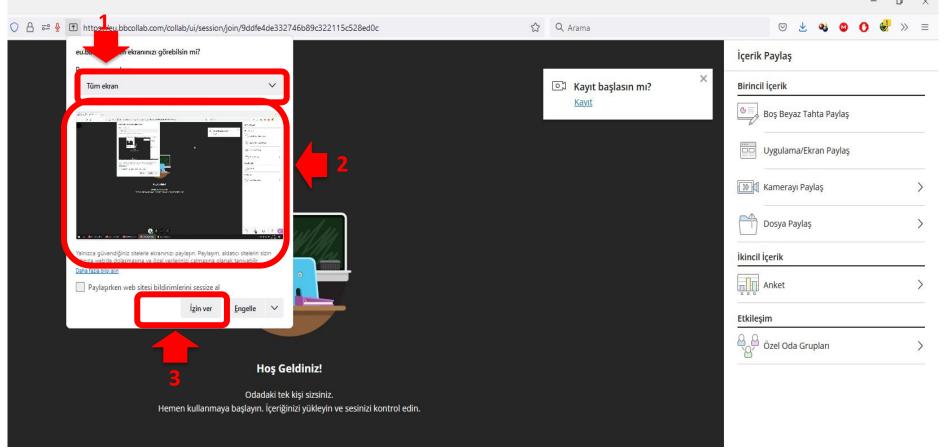

Content Sharing in a Video Conferencing Room

Click on button 1 for screen or application sharing option. Then select the screen you want to share (powerpoint presentation) or the full screen with text.

The content you will share is shown in the field number 2. Finally, you can share content by clicking on the share option.
